Skills

Programming Languages :

Java, C, Python

Frameworks :

Java Spring Boot, FastAPI, LangChain

Frontend Technologies :

HTML, CSS, React

Databases :

SQL, ChromaDB (Vector Database)

Tools / IDEs :

Visual Studio, Eclipse IDE, GitHub, Uvicorn, Ollama, Pytest

Concepts :

Data Structures & Algorithms, OOPS, System Design, Retrieval-Augmented Generation (RAG), Vector Embeddings, REST APIs

Education

Sir Chhotu Ram Institute of Engineering & Technology

Meerut • 2023-Present

B.Tech in Computer Science and Engineering

St.Al.Haneef Educational Centre

Chandauli • 2023

Intermediate (12th)

St.Al.Haneef Educational Centre

Chandauli • 2021

High School (X)

Summary

Computer Science student with strong programming fundamentals, leadership abilities, and a problem-solving mindset. Skilled in writing clean, efficient code and applying creative and critical thinking to real-world projects. Seeking opportunities to learn, contribute, and add value to organizational goals while accelerating personal growth.

ACHIEVEMENTS & CERTIFICATIONS

Achieved a 5-Star HackerRank rating in Java and successfully solved 500+ problems on CodeChef with a 1400 rating.

Nominated at college level for the Smart India Hackathon (SIH) by presenting an innovative and practical solution.

Actively contributed to management, event operations, and communication, serving as a core member of SIO NGO.

Experience

BerryBloomer Pvt Ltd

Jan/2026 - May/2026

Java / Full Stack Developer (Intern / Trainee / Developer)

- Worked on MyPet, a full-stack pet marketplace mobile application using Spring Boot and React Native (Expo).
- Developed and secured RESTful APIs with JWT-based authentication, OTP verification, and Spring Security.
- Implemented core modules including pet listings, user management, subscriptions, payments, and media upload.
- Integrated Razorpay payment gateway and followed layered architecture (Controller–Service–Repository) for scalable backend design

Projects

IntelliRAG

Tech Stack: Python, FastAPI, LangChain, ChromaDB, OpenAI / Gemini / Ollama, Pydantic, Next.js (React), Pytest, Uvicorn

- Built a production-ready RAG backend using FastAPI, LangChain, and ChromaDB with an end-to-end PDF ingestion pipeline.
- Designed a pluggable multi-LLM architecture supporting OpenAI, Gemini, HuggingFace, and Ollama via environment-based configuration.
- Implemented context-aware question answering using vector similarity search with source attribution and confidence scoring.
- Developed an async FastAPI backend with modular services, Pydantic v2, structured logging, and robust error handling.
- Built a Next.js (React/TypeScript) frontend and Pytest test suite with dependency injection for efficient API testing.
